Licence

This scenery is offered by LHSimulations to all flight simulator fans free of charge. We have created this scenery with a lot of work not asking a cent. We only expect from our users some respect towards our products and accept some terms which ensure that our product or its content is not used by any other freeware or payware add-on. Installing this scenery means you accept our terms of use. This is a freeware scenery but not for commercial use! It can be downloaded only from LHSimulations website! Only LHSimulations can distribute it. It is forbidden to upload to any website, file server, file share website! It is strictly prohibited move, copy and modify any objects, texture in the scenery. If you have any question contact us: info@lhsimulations.com

We do not take responsibility the damages what may caused by this FS add-on. The installer does not change/overwrite any data on your computer. If you encounter any problem related to the scenery report your problem through one of our contact (see Contact)! But we cannot guarantee a solution!

About LHSimulations

LHSimulations was founded in 2009. Our mission is to collect all Hungarian flight simulator add-on designer to work together and design freeware Hungarian sceneries or aircrafts. We try to provide all necessary tools to our designers to establish team work. We also support members who are interested in scenery or aircraft design through our forum. We are operating an ftp server, a forum, a teamspeak server and a website. We do mainly scenery design. Our secondary mission is to design all major Hungarian airports. This mission is called 'Hungary Scenery Project'. Debrecen scenery is also one of the milestones of this project.

We are continuously recruiting designers. If you are interested to work with us, contact us on our forum or any communication line (see Contact)!

General:

Debrecen Airport is one of the five international airports in Hungary. The airport is located 5 km's South from Debrecen town. Since 2001 it is an international airport. It operates mainly charter flights. The history of Debrecen Airport goes back to the early 20th Century. The first official regular flight carrying mail took off in 1930. Subsequently the Airport served sport and military purposes. During World War II it was the base of a Hungarian bombing squad. From 1930 it had remarkable domestic traffic serving flights from Debrecen to Budapest and to other major cities in Hungary. Between 1946-1968 Debrecen Airport functioned also as an emergency airfield for Budapest Airport. Following World War II the Soviet air force had control over the airport until 1990. The political transition brought revival of the airport and international civilian traffic was launched together with sports aviation. In May, 1991, Soviet troops vacated the airport and handed it over to the Hungarian State. In 1994 Debrecen Municipal Government realized the need to develop the airport and included it in its development plan. The city purchased the airport and has been steadily developing it. The comprehensive Development Program of Debrecen Airport was launched in 2001, the stages of this development program were as follows:

May 29, 2001 - Airport status: non commercial airport for domestic flights also open to international traffic.

Dec 29, 2001 - Airport status: commercial airport for domestic flights also open to international traffic.

May 16, 2002 - Airport status: International airport for domestic flights also open to international traffic.

April 22, 2004 - Airport status: permanent border crossing and customs Route.

Till 2004 Debrecen city invested 3,5 billion Forints to buy out, operate and continually develop Debrecen Airport.

Official website of Debrecen airport : <http://www.airportdebrecen.hu/>

The scenery:

After the launch of our very first scenery LHSM Sármellék the Hungarian Flight Simulator community immediately requested a high detailed scenery for Debrecen as well. As we had the Sármellék scenery as our reference we have contacted the management of Airport Debrecen Kft (CO). They were very happy when they heard we would like to create an FS scenery for Debrecen. They were very helpful and gave us the opportunity to visit the airport in and out. We could take hundreds of high quality photos which helped a lot in the creation of the scenery later.

Designing the scenery took approx. 1,5 year. We have designed the scenery parallel for FS2004 and FSX. This is the first scenery where we have added few animations.

After the FSX release we started to convert the scenery for X-Plane.

Installation

Extract the zip file to Plane 9/Custom Scenery folder. That's it!

For the PERIT standard departure you may need the EN NDB. You may create it in X-Plane using the following data:

Name: DEBRECEN NDB	id: EN
lon: 021 41.170	lat: 47 31.597
frq: 383	range: 025 (nm)

The Team:

Tibor Kókai converted the scenery for X-Plane.

István Bíró (m814) : textures and ground polys.

Sándor Tar (tsGucci) : 3D objects.

Tibor Kókai (Zlin142), Jankovics István (Papírzacsi) : Static aircrafts, bunkers and other vehicles.

Boldizsár Fodor (Swift) : vegetation, autogen

Boldizsár Szily (Boldizsár) : Textures.

Special Thanks:

We would like to thank the management of Debrecen Airport for their support, especially Zsolt Forgács and Zsolt Pilván.

Thanks to Arno and ng4x (fsdeveloper community) for their help.

Thanks to Tibor Kókai for creating the X-Plane version.

And thanks to everybody who contributed to this scenery.
